

Environmental Policy

Founded in January 2007 by Paul Bailey and Tom Ahmad, Bailey Ahmad is an independent firm which specialises in providing corporate and personal rescue, recovery and insolvency advice to those in financial difficulty. Our firm is supported by a dedicated team of skilled, qualified and motivated staff who strive to provide a high quality service to those who seek our assistance.

Bailey Ahmad primarily impacts on the environment in terms of paper waste and energy usage. Bailey Ahmad is committed to operating in an environmentally sustainable way. Accordingly, the following steps have been taken to reduce our impact on the environment:

- ✓ Reduced electricity usage by:
 - Implementing a 'switch lights off' campaign amongst staff;
 - The use of timers on office equipment such as printers and photocopiers to ensure that they are turned off outside of office hours;
 - The use of energy efficient light bulbs;
 - The ongoing monitoring of utility meter readings;
 - The use of new energy efficient computer monitors and office server.
- ✓ Minimising the amount of energy used for heating by reducing the maximum thermostatic temperature set in the office and the installation of new double glazed windows at Bailey Ahmad's head office.
- ✓ Aerators have been fitted on taps to reduce the amount of water used.
- ✓ Bailey Ahmad fully utilise technology including digital signing, electronic records filing, and document management to reduce paper usage. In addition, whenever possible correspondence and circulars are issued electronically to reduce waste and the environmental impact of items being transported by mail.
- ✓ Recycling of office waste is encouraged.
- ✓ Bailey Ahmad has introduced a Sustainable Procurement Policy ensuring the most sustainable option is chosen for all purchases.
- ✓ Regular team meetings are held to communicate our environmental policy and to provide a forum to share ideas on possible environmental improvements.
